

## CAST Bullet Light Retrofit Modules Product Information

### CAST Retrofit Modules for the Classic & LED Bullet Lights

#### Retrofit Assembly for MR-16 Bullet

This LED Retrofit is a solution for existing CAST Bullets (CBL1CB) that were manufactured after 2007. Older bullets have a smaller interior space, which is too small for this module. The slug screws into the base of the CBL1CB, to attach the module and create a heat sink. With (3) different models, replaceable optics, and advanced driver features, these modules can create the same effect that comes from the CAST LED Bullet Light (CBLED141).

Options:

**CBRML141** - 41° Assembly

**CBRML121** - 21° Assembly

**CBRML112** - 12° Assembly

#### LED MR-16 Module replacement for CBLED141

This LED Module replaces the 41° module inside the CBLED141.

Options:

**CBLMOD141** - 41° Assembly

**CBLMOD121** - 21° Assembly

**CBLMOD112** - 12° Assembly

If you would like to change out the 41° optics within the CBLED141, these are sold separately. The only reason to replace the entire module, would be in the case of a failure.

Options for Optics:

**C10139** - 21° Optics for LED Module

**C10003** - 12° Optics for LED Module
